LEARNING RESOURCE CENTRE

“Just like the beautiful flowers in a garden God’s Children come in different shapes, sizes, colours and abilities. Yet like the flowers, each one is beautiful and has his or her own special gift to offer the world. Unfortunately, the world seems to accept only those who conform to its dictates.”

Approximately 800 million young children worldwide are affected by biological, environmental and psychosocial conditions that can limit their cognitive development. In Europe, recent estimates place the number of children with Special Educational Needs (SEN) at 15 million. SEN is not a disease. It is a correctable deviation of a child’s psychological being, which can be normalized to a greater extent the sooner it is identified and accepted by both parents and teacher alike.

The Learning Resource Centre (LRC) of Alethea School & Alethea International School is a centre for children with Special Educational Needs (SENs). It is headed by Ms. Sharon Fernando along with Ms. Yoga Loganathan and Ms. Amali Perera.

At the LRC the teachers strive to identify students who face challenges in their education as well as their well-being and to provide them with the skills necessary to empower them to become active members of the society by helping them to reach their potential by utilizing their individual strengths. The teachers provide a caring community where they meet the students’ diverse academic, social and emotional needs.

The LRC places emphasis on the following:

- Employ special educational strategies and techniques during lessons to improve students’ language, cognition and memory.
- Help students acquire socially acceptable behaviour as determined by their Individualized Education Plans (IEP) by employing techniques in a positive behavioural support system.
- Modify the general education curriculum for students with Special Educational Needs so that they benefit from classroom instructions.
- Integration of IT skills and Life Skills Training in to their IEPs.
- Develop plans for effective communication for students in the classroom setting.
- Meet with parents to discuss their child’s progress and to determine priorities for their IEPs.
- Provide counselling for students with behavioural and emotional problems.

At the conclusion of the academic year July 2016 the LRC comprised 26 students as follows:

Section	Number of Students
---------	--------------------

Primary School	11
Middle School	6
Senior School	9

Robert John Meehan said, “Every child has a different learning style and pace. Each child is unique, not only capable of learning but also capable of succeeding.” That is our mission at LRC and we are committed to achieving it.

"One Language sets you in a corridor for life. Two languages open every door along the way" Frank Smith

Teacher In Charge:

Ms. Nirosha Navaratnam

The English Department has consistently worked towards equipping students with the necessary tool to shape their world. The English language, also known as the 'International language' brings with it, its set of rules and exceptions and complexities in understanding and applying the language.

At Alethea, the primary, middle school and senior school English language teachers work in collaboration to ensure a smooth and uninterrupted delivery of academic work. Students are trained to perfect the use of Standard English in their speech and written work while great emphasis is placed on creativity and imagination. To facilitate this, the faculty uses a variety of resources ranging from books, worksheets, group activities and audio/video aids to enhance learning.

During the course of last year, the English department identified high achievers in the London O Level class and prepared them to sit the GCE O level English Language one year ahead. We are very happy to say that all three students who sat the exam got through with excellent results.
